

After nearly 20 years of unofficial celebration, the United Nations now recognizes **June 8th** as **World Oceans Day**

Most W.O.D. celebrations around the U.S. include creative renditions of Dr. Seuss's **One Fish Two Fish, Red Fish Blue Fish**. What's the most unique way you can retell this famous story?

Can you come up with an alternate W.O.D. logo?

The Monterey Bay Aquarium's live webcams at http://www.montereybayaquarium.org/efc/cam_menu.aspx make great screensavers (or virtual aquariums) for your classroom smartboard!

The swarm of bees sound heard throughout the FIFA World Cup this year in South Africa is from thousands of plastic horns known as

voo - voo - ZAY - luhs

(They are inspired by the kudu horn which is traditionally used to summon distant villagers to community gatherings!)

The problem with creating a sound filter for these monotone 3-foot yawpers is that they do not produce a "pure tone" like a whistle (which has a single frequency that can be isolated.) Rather, the sound covers a range of frequencies that include those produced by normal speech tones.
