

number solitaire

OBJECTIVE: To place the digits 1 – 36 in consecutive order into the 6x6 grid above.

DIRECTIONS: Start by placing the number 1 in *any* square. You may now move in any direction but you must skip (2) squares for any move up, down, left, or right or (1) square for any move diagonally (See example.) Continue moving to open positions and writing-in numbers while skipping squares accordingly.
How high can you go?
